A Complete Bath Brand

Jaquar group has been built on a platform of the highest quality standards and aesthetics, with the intent of creating world-class products.

It is an approach that has transformed India's bath fittings industry from being merely utilitarian to one that's aspirational. And it has transformed Jaquar into an undisputed market leader.

The group's vision to evolve into a 'Complete Bathing Solutions' enterprise has also reached fruition through continuous R&D and the successful diversification into various bath verticals like sanitaryware, shower enclosures, water heaters, concealed cisterns, and a wellness range of products - whirlpools, shower panels, showers, steam cabins and spas.

Jaquar now introduces a complete range of modern water heaters, ranging in capacity from 1 litre to as much as 425 litres, to cater to the needs of every home.

Choose from the extensive range of options in the following pages and discover why India trusts Jaquar to enjoy the experience of bathing.

How to buy a better water heater: Ask the right questions!

1. What size of water heater is right for my showering needs?

Every bathroom needs a different size of water heater depending on the the climate of the place, the kind of fittings and number of people who use it. Rain showers, bathtubs and whirlpools need large capacity water heaters, while kitchens require smaller ones.

Jaquar has a full range of modern water heaters ranging from 1 litre for your kitchen, to 425 litres for large homes. Ask your Jaquar dealer to recommend the right size for your needs.

2. Is it a water heater made for India?

Like the diversity of the country itself, the water supply conditions of India vary from one location to another, and from one kind of home to another.

Jaquar's range of water heaters have been developed to work in tough Indian conditions, with features that offer more safety, more savings and more life built-in.

3. Years from now, if I need service, will the brand be around?

In an age when technology is advancing at a rapid pace, it is easy to make a mark as an innovative brand and product. However, what matters most in a product is the long-term reliability of service.

Jaquar is a Complete Bathing Solutions enterprise which has, for over 50 years, invested in continuous R&D and successfully diversified into various bath verticals like faucets, showers, sanitaryware, shower enclosures, cisterns, and a whole range of wellness products - whirlpools, shower panels, showers, steam cabins and spas.

Choose from the extensive range of water heaters in the following pages and discover why India trusts Jaquar to enjoy the experience of bathing.

Water heaters that give you more.

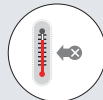

To ensure that they are worthy of the trust that is placed by customers in every Jaquar product, a whole range of safety, longevity and energy efficiency features have been built in to these water heaters:

MORE SAFETY

- Double Safety Thermostat – dual overheating control mechanism cuts off power automatically even if primary cut off fails
- Multi-function Safety Valve – discharges water and acts as a non-return valve if pressure or temperature exceed preset limit

**Multi Function
Safety Valve**

**Double Safety
Thermostat**

**Earth Leakage
Circuit Breaker**

MORE LIFE

- Superior Quality Glass-lined Inner Tank – prevents rust, corrosion and prolongs the life of the inner tank
- Single/Dual Glass-coated Incoloy Heating Elements – made of high quality steel for quicker heating and prevent scale formation

**High Quality
Glass Lined Heating
Element**

MORE SAVINGS

- High Density Insulation – CFC-free PUF insulation, extra thick than normal to minimize heatloss and maximize energy savings
- Cathodic Protection – a sacrificial Magnesium Anode protects and saves the tank from electrochemical reactions during water heating

Energy Saving
High Density
Puf Insulation

Cathodic
Protection
